PROFILE

Senior QA Engineer with 15 years of hands-on functional testing: I turn business requirements into test plans, find the defects that matter and give project teams a clear, evidence-based Go/No-Go. Autonomous and a true team player, at ease with business owners, Business Analysts and developers alike.

I cover the **whole software-quality chain**, from requirements analysis to **Go/No-Go**: reading **user stories** and specifications, **test strategy and plan**, **test case design** and coverage matrices, **execution** of functional and regression campaigns, **defect management** and **reporting**. At **BRED Banque Populaire**, I designed the **test cases** and **acceptance handbooks** in **Xray / Jira** for the **IT acceptance testing** of a new P2P e-invoicing tool, and checked with **SQL** the migration of data from the legacy database to the new one. At **Accor** (iOS / Android apps deployed in 100+ countries), **Oodrive**, **Visident** and **Vinci Construction**, I ran this chain end to end, using **ISTQB techniques** and multi-team campaigns in **Jira / Xray**. **Autonomous and collaborative, rigorous and close to the business**: I know what to test, where the risks are and how to report them clearly.

THE FULL QA CHAIN, END TO END

- 1 Requirements analysis
- 2 Test strategy & plan
- 3 Test case design
- 4 Environments & test data
- 5 Test execution
- 6 Defect management
- 7 Acceptance & Go/No-Go
- 8 Reporting & retrospective

KEY SKILLS

FUNCTIONAL TESTING & TEST STRATEGY

Functional testing · User acceptance testing (UAT) · FAT / SAT · User story and specification analysis · Test strategy · Test plan · Acceptance handbook · Test case design · Coverage matrix · Regression testing · Exploratory testing · E2E testing · Compatibility testing (mobile iOS / Android, cross-browser, multi-OS) · Test data preparation · Defect management · Test scoping and coordination · Test reports and reporting (KPIs) · Go/No-Go · Production release · Risk-based prioritisation · ISTQB techniques (equivalence partitioning, boundary value analysis, decision table testing, state transition testing) · Level-3 support

TEST & DEFECT-TRACKING TOOLS

Jira · Xray · Zephyr · TestRail · TestLink · Flyspray · BugProfiler · Confluence · ServiceNow · Redmine · Postman (REST API, JSON, HTTP, SOAP) · SQL Oracle · Mainframe · SAP BPC / HANA

ENVIRONMENTS & MOBILE

BrowserStack · TestFlight · Charles Proxy · Crashlytics · Dynatrace · Android / iOS · Windows / macOS / Linux · VMware · VirtualBox · Nutanix · Corcentric

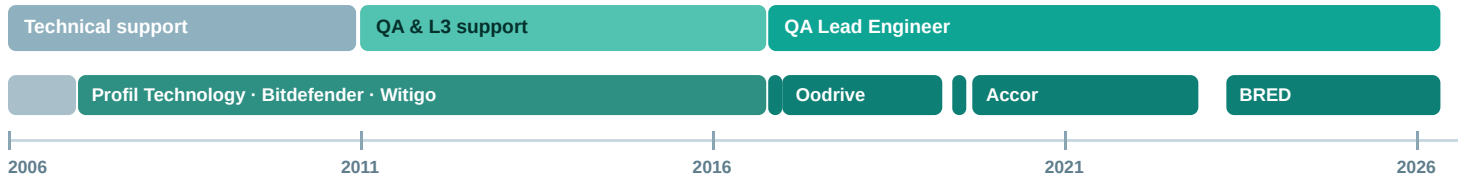

METHODS & SOFT SKILLS

Agile Scrum · V-model · 3 Amigos · Shift-left · BDD / Gherkin · Multi-team coordination · Business-owner liaison · Tester team lead · Vendor supervision · Autonomy · Team spirit · Rigour · Creativity · Attention to detail · Communication

AUTOMATION & AI APPLIED TO TESTING

Playwright (E2E, TypeScript) · Vitest · Appium · Ranorex · AutoIT · GitHub Actions (CI/CD) · Git · Docker · Python · AI-assisted test case generation · Prompt engineering · LLMs (Claude, GPT, DeepSeek, Ollama, LM Studio)

PROFESSIONAL EXPERIENCE

BRED Banque Populaire — Electronic invoicing & regulatory compliance

Apr. 2023 — May 2026 · Paris **3 yrs**

Senior QA Consultant — Freelance SASU

Compliance programme for the electronic invoicing reform, **P2P / O2C** scope, banking IS (**Mainframe, SQL**), with the accounting department and the IT (DSI) teams.

- ◆ **IT acceptance testing of the new P2P tool:** design of the **test cases** and **acceptance handbooks** in **Xray / Jira**, based on the user stories.
- ◆ **SQL checks on the data migration:** verifying that data from the legacy database (COM database) is correctly migrated into the new database, from the right source.
- ◆ **Execution** of the test campaigns, **defect** follow-up and progress **reporting** at the daily stand-up.
- ◆ Collaboration with accounting, IT (DSI, the data owner), Business Analysts and developers, in **Agile / Scrum**.

ENVIRONMENT · Jira, Xray, SQL, Mainframe, Corcentric, ServiceNow, Confluence — Agile / Scrum

Accor — Mobile apps iOS & Android, 100+ countries

Sep. 2019 — Dec. 2022 · Paris **3 yrs 4 mo**

Mobile QA Lead — Consultant

QA lead for the “booking journey” feature team of Europe's #1 hotel group, on apps deployed in **more than 100 countries**. **The full QA chain:**

- ◆ **Requirements analysis:** study of user stories with the PO, acceptance criteria, testability from design.
- ◆ **Test case design** for the **critical E2E journey** (login → hotel search → availability → room / rate / options → currencies → payment → confirmation); **Gherkin** formalisation of the scenarios.
- ◆ **Execution of functional, regression and compatibility** campaigns (Android / iOS, real devices, BrowserStack): push notifications, install / upgrade, recovery after forced kill, multi-language, multi-currency.
- ◆ **Defect management:** analysis of network and API exchanges (Charles Proxy), qualification with impact analysis in Jira / Xray, follow-up through re-test.
- ◆ **Go/No-Go reporting** to product management; **automated test cases (Appium)** supporting the automation engineers.

ENVIRONMENT · Jira, Xray, BrowserStack, TestFlight, Charles Proxy, Crashlytics, Gherkin, Appium, Android, iOS, Confluence

Visiodent — Healthcare software publisher (Veasy)

Jun — Aug 2019 · Paris

Software Quality Manager

- ◆ **Analysis** of business journeys and regulatory requirements; integration of French health insurance card (**Carte Vitale**) reading into test scenarios.
- ◆ **Test plans, coverage matrices and test cases** on business and regulatory journeys.
- ◆ **Execution** of functional, regression and cross-browser compatibility campaigns; **defect management** and quality **reporting**.
- ◆ **Lead of a team of testers** and supervision of an external automation vendor on the Veasy healthcare business software.

ENVIRONMENT · Jira, Xray, Dynatrace, CloudNetCare

Oodrive — Sovereign cloud B2B/B2C (BoardNox, WebSynchro, PostFiles)

Jan. 2017 — Apr. 2019 · Paris **2 yrs 4 mo**

Software Quality Engineer / QA Manager

Quality lead on **3 critical products** of the French sovereign cloud: board meeting governance, encrypted synchronisation, secure transfer of large files.

- ◆ **Structuring the publisher's QA practice:** test plan templates, entry / exit criteria, defect workflow in Jira / Zephyr.
- ◆ **Requirements analysis, test case design and execution** across the 3 products: functional and regression campaigns for major releases.
- ◆ Validation of **multi-OS compatibility** (Windows / macOS) on a Nutanix VM farm, cross-browser (Chrome, Firefox, Edge, Safari) and multi-version Outlook.
- ◆ **Defect management and quality reporting;** **level-3 support** for key accounts (diagnosis, reproducibility, targeted escalation).
- ◆ **Introduction of regression test automation (Ranorex)** to speed up validation cycles.

ENVIRONMENT · Jira, Zephyr, Ranorex, Nutanix, VMware, Confluence, Windows / macOS / Linux, Outlook

Vinci Construction — SAP BPC applications (financial consolidation)

Oct. 2016 — Jan. 2017 · Paris

QA Consultant / Quality Engineer

Functional testing of **SAP BPC** applications: compliance, data integrity and consistency of consolidated financial statements. **Analysis of business requirements, test case design, execution** of validation campaigns, **defect** tracking and **reporting**. Redmine, TestRail, SAP BPC, SAP HANA.

Test Engineer & Level-3 Support · previously **Level-3 Support – Malware Analyst – Tester**

R&D division of Profil Technology, publisher of **Witigo**, a consumer range protecting children online (digital content filtering), built **from scratch** across **Windows, macOS and Android**, with an **image-detection component** based on early AI approaches (2011 – 2016).

- ◆ **Functional testing of Witigo** on Windows, macOS and Android: website filtering by category and language, allow / block lists, time schedules, keyword filtering, application control.
- ◆ **Testing of the image-detection component** (early AI approach) and of the product's multi-environment components.
- ◆ **Specification analysis** of product changes, **test plan design** and **functional, regression and acceptance** test campaigns across platforms; **test cases** (TestLink, Excel); **defect management** from bug report to closure (Flyspray, BugProfiler).
- ◆ Set up **test platforms** (Windows, macOS, Linux, Android tablets, iOS, VMware / VirtualBox, system images); **automation** of repetitive tasks (AutoIT); **reporting** and raising alerts.
- ◆ Product improvement proposals (**ergonomics, options**); **level 1 to 3 support** in French, English and Spanish, FAQ writing, pre-sales support for a key customer.
- ◆ **2007 – 2011, the early years**: Bitdefender level-3 support (Retail and Corporate), malware analysis, DMZ test lab, first tests of Bitdefender products and the WebFilter proxy.

First steps (2006 – 2007), technical support: Conforama — IT Support Engineer · Samsung — Support Engineer

INTERESTS

Local LLMs, hardware & multi-OS
 I run local LLMs on **Apple Silicon (M5 Max, 128 GB)**, **AMD (Vulkan)** and **NVIDIA on Ubuntu**, and I enjoy trying out new Linux distributions.
 → **Technical curiosity: hardware, software, multi-OS**

Connected devices
 Smartwatches, Plaud Pro, smartphones, connected health products.
 → **A user's eye**

Vibe coding & AI agents
 Claude Code, Hermes Agent, Perplexity, DeepSeek, Harness.
 → **From idea to working tool**

Street photography
 Fujifilm X-Series, in the spirit of Henri Cartier-Bresson: the “decisive moment”.
 → **Sharp observation**

Acrylic painting
 Abstract and portrait.
 → **Creativity: also useful to imagine the test cases nobody expected**

Travel
 41 countries visited solo, daily English practice.
 → **Adaptability**

Kung-fu Wing Chun & meditation
 Wing Chun practice and meditation.
 → **Discipline, self-control**

Available immediately — long-term assignments preferred · **Freelance SASU** (direct invoicing or subcontracting through consulting firms) · **Paris / Île-de-France**, remote, hybrid or on-site · mobile across France and Europe. Engagement: **functional testing & QA leadership**.
